SUMMARY

BCA graduate and full-stack developer (MERN) with hands-on delivery of 4 self-built projects, including a role-based NGO management platform with JWT authentication. Comfortable across the stack — React.js frontend, Node.js/Express.js backend, MongoDB/MySQL — and version-controlled all code via Git/GitHub. Completed structured full-stack training through the InfoBeans Foundation ITEP program; eager to begin a career as a Software Engineer.

TECHNICAL SKILLS

- **Stack:** MERN (MongoDB, Express.js, React.js, Node.js).
- **Languages:** Core Java, JavaScript.
- **Frontend:** React.js, HTML, CSS, Bootstrap.
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Express Middleware, EJS Templating.
- **Databases:** MongoDB, MySQL.

PROJECTS

ServeConnect — NGO Management Platform (MERN)

- Built a full-stack NGO management platform on the MERN stack with JWT authentication and role-based access control.
- Implemented volunteer registration and campaign management modules; deployed live at frontend-serveconnect.onrender.com.

Sports League Management — Java (JDBC)

- Developed a league/team data management system using core Java and JDBC for database connectivity — [GitHub](#).

To-Do List App — Node.js / Sequelize

- Built a task management REST API using Node.js and Sequelize ORM with MySQL — [GitHub](#).

BeanConnect — Social Media Platform

- Built core social-platform features (user profiles, posts, connections) using the MERN stack — [GitHub](#).

EXPERIENCE

Full Stack Trainee — InfoBeans Foundation (ITEP Program)

- Completed an intensive full-stack training program covering the MERN stack, Git/GitHub workflows, and RESTful API design.
- Strengthened proficiency in React Hooks and Express middleware by building and refactoring multiple practice applications.

Telecalling Team Lead — AKSA International (8 months)

- Led a team of telecallers, designing structured training sessions and standardized call scripts to improve team performance.
- Maintained customer engagement quality by monitoring call performance and implementing feedback loops to reduce escalations.
